In the Specification

Applicants present amended paragraphs below indicating the changes with insertions indicated by underlining and deletions indicated by strikeouts and/or double bracketing.

Please amend the abstract as follows:

A method of fast random access management of a DRAM-type memory is provided.[[,]] including The method includes the steps of[[:]] dividing the memory into memory banks accessible independently in read and write mode[[;]], identifying the address of the bank concerned by a current request[[;]], and comparing the address of the bank concerned by a current request with the addresses of the N-1 banks previously required, N being an integral number of cycles necessary to the executing of a request[[;]]. and if If the address of the bank concerned by a current request is equal to the address of a bank corresponding to one of the N-1 previous requests, the method includes suspending and memorizing storing the current request until the previous request involving the same bank is executed, otherwise, executing it.

In the Drawings

Applicants have amended Figure 1 to include the legend "Prior Art." The Examiner is respectfully requested to review and enter the amendments to Figure 1.

A request for approval of proposed drawing corrections is attached.
